1. [redacted] memo on movement of personnel from [redacted] raises a good point regarding security aspects of too many aircraft appearing at [redacted] at one time. I propose to discuss this problem with [redacted] and other people concerned on my trip to [redacted] next week. According to our basic agreement SAC is responsible for movement of personnel and equipment from [redacted] to overseas bases. I do not know if this includes DC-6 aircraft for movement of personnel.

25X1A9a

2. I will cover these points when I am out there and if there is any action necessary by this headquarters, if time is essential we will send in a wire stating what action we would like this headquarters to take. [redacted] is of the opinion that [redacted] possibly has this movement pretty well arranged already.
